

# MİRAC BAYSAL

## SOFTWARE DEVELOPER

### ABOUT ME

I have grown up with computers since my early ages. I constantly improve myself in software and hardware areas and follow technological developments closely. In addition to my school education, I also use my high English language skills to learn from international sources. I have deep knowledge in various programming languages and I am enthusiastic about applying my knowledge to practical projects. I am focused on continuous learning and self-improvement in the world of technology and software. I aim to be an expert who produces innovative solutions in the field of software development and computer science and developing effective projects using the latest technologies in the sector.
